## Ammonium Sulfate Exports/Frofits of Leuna

3. "The Leuna Works are exporting considerable amounts of ammonium sulfate to the USSR, and also to Sweden. Deliveries of reparations are now called industrial exports. The profit of the Leuna Works, amounting to approximately 160 to 180 million Sweet German Marks per year; is, as before, transferred to the USSR.

### Five-year Plan

4. "We are presently working on projects for the second five-year plan, 1956-1960. The Leuna Works are directed to produce by 1960 the following

Methanol
Nitrogen as fertilizer
Synthetic gasoline and diesel fuel
120 thousand m tons/yr
400 to 500 thousand m tons/yr
170 thousand m tons/yr

The figure for synthetic gasoline is to be understood over and above the present capacity. The increase of the synthesis gas production will be based on the use of Winkler gasifiers using lignite char. 2 The synthesis gas production using coke from bituminous coals will be slowly abandoned so that raw materials from Soviet Germany may be used as a basis for its

### Military Training

- years of military training, are transferred into the factories as workers. Volunteers are then militarily trained to replace the transferred policemen (good salaries). In that way, they are raising a Soviet Army in Germany. Furthermore, the SED party is forming armed attack troops in the factories ussR prepares here, slowly but systematically, for an armed attack on the western Europe. A sudden attack on the Federal Republic and France would not surprise us. The West has to rearm much faster or it will lose
- 6. "Our vacation homes are continuously inhabited by 'liberty fighters' (Communists) from the Federal Republic on a cost-free pasis. What is the western world up to?

# Radio Reception/Suggestion to Improve Morale

7. "At Leuna, the radio stations Rias and NWDR can no longer be heard as a result of the eastern disturbing stations. collowing steps to improve our situation. If enacted, it would show that the Federal

2. The Winkler process is well tried out and is now in use in Leuna.

3. Vacation homes probably refer to vacation resorts maintained by

Republic is not giving us up:

- a. Stations of sufficient capacity, which certainly could be heard, should be erected in West Berlin and at the border of the Soviet German zone.
- b. The East German youth should be attracted to study at West German universities by arrangements which enable them to study free of charge.
- c. Return tickets (not round-trip tickets) for Soviet Germans visiting the Federal Republic should be made available free of charge.

#### Political Atmosphere

8. "In economical regards, the USSR has made some concessions, as a result of June 1953, in favor to the Soviet zone. Politically, however, the riots pressure is continuously increasing. In March 1954, two chemists of the Leuna Works were fired since they had been elected as leaders of the strike organization on 17 Jun 53. Whoever stays in the Soviet zone has to agree on the political stupidity or, otherwise, will lose his position.

Leuna Personnel/Returnees from USSR

- 9. "Some of the chemists and engineers, deported to the USSR in 1946, returned to Leuna Two of these are Messrs (fnu) Asinger and (fnu) Smeikal. In the USSR, they earned 6 thousand to 8 thousand rubels per month. Chief engineer (fnu) Roesch of the Electrical Department died. Mr (fnu) Deinhardt has retired 5, Dr (fnu) Zapf 6 escaped to the Federal Republic More and more are leaving.
- 10. "Please, destroy this letter after reading or copying, whereby my signature should be omitted."

-end-

MORARY CURLECT & ACEA CODES

- 5. Deinhardt had charge of the oxygen plant.
- [6. Zapf had charge of water utilities\_7
